Gear Guidelines

Futbol doesn't require a lot of gear for each player other than shin guards and cleats, but it's a good idea to give some thought to all of these essential pieces of equipment before you play.

- **Cleats** - Choose a pair of shoes with molded cleats or ribbed soles. Shoes with screw-in cleats may carry a higher risk of injury, so only use them when you need extra traction, such as on a wet field or a field with tall grass. Make sure your cleats fit properly and are laced up tightly each time you play.
- **Shin guards** - If futbol players get lower leg injuries, it's usually because they weren't protected with adequate shin guards. A good shin guard will mold to the shin, end just below the knee, and fit snugly around the ankle bone. Bring your soccer socks and cleats with you when you buy shin guards to be sure that they'll fit properly.
- **Socks** - These are meant to hold shin guards securely in place and should be worn anytime you practice or play.
- **Other gear** - Mouthguards are a good way to protect your teeth, lips, cheeks, and tongue, and can help prevent head and neck injuries such as concussions and jaw fractures.
